The Solar Hair Dyc.

June 26

Dr. GIBSON SMITH'S Instantaneous Solar Hair Dye is superior to all other preparations now used. Becoming disgusted with the filthy, unhealthy and poisonous compound of the day, he prepared the Solar hair dye for his own especiel use, and tested its su-

is personal and intimate friends, for two years efore offering it to the public.

The Solar Hair Dye is a colorless transparent liquid. A beautiful glossy black is imparted to the hair by moistening it with the Dye, and standing a few seconds in the sun's rays. Hence its appropriate name, Solar Hair Dye.

From chemical analysis Dr. Smith has discov-

ered that white or gray hairs are caused by a superabundance of lime in the hair. The Solar Hair Dye, together with the chemical action of the sun's rays, removes this surplus of lime and imparts to the hair its beautiful dark color. Color parts to the hair its beautiful dark color. Color is a property inherent in light; and thus it is seen that this Dye is compounded on strictly natural and scientific primiples. The result is the dark, beautiful color imparted to the hair by this dye. Does not fade, and so perfect is the color that no one can distinguish it from nature.

The Solar Hair Dye may be applied without the assistance of a barber. The hair needs no cleaning after applying the dye, for it produces no smut, not enough to soil the whitest linen.

to smut, not enough to soil the whitest linen. The Solar Hair Dye helps weak eyes, relieves very much, nervous headache, and promotes the growth of the hair, rendering it soft and moist.
